SUMMARY

I am creative and obsessed with delivering user centred designs. I am experienced in user-centered design, requirement gathering, research, creating user-flows, developing interactive wireframes. Excellent rapport and collaboration with colleagues, management, customers, and vendors

EXPERIENCE

May 2021 - Present
HENCE SOFT

UI/UX Designer

Oversee the user experience process for a Jewellery application. Helped to understand our user's audience with the creation of personas and journey maps, conducted surveys, and interviews, creation of wireframes, prototypes, and QA testing sessions.

September 2017 -
April 2021
IT PROS

UI/UX Designer

Project investing was a SaaS web app for mainly mining engineers, investors, and agencies which helps them calculate ECG ratings and gain more exposure from investors. I started this project from scratch where I did research, persona, user journey, and IA which led the process into wireframe and then high fidelity.

Capstone Project | Academy Project

Developed user interface with Figma and Sketch for the stock trading application where users can buy and sell stocks and the admin will be responsible for creating new stocks and setting the initial price.
